SKILLS

- **Languages:** Python, C , C++ Basics
- **Technologies:** HTML, CSS, JavaScript
- **Databases/Tools:** MySQL, MongoDB, GitHub
- **Soft Skills:** Problem solving, Team collaboration, Time management, Adaptability, Quick Learning

PROJECTS

Affiliate Shopping Website | [GitHub](#) Jun 2026 - Jul 2026

- Developed an affiliate fashion discovery website featuring dedicated sections for men, women, footwear, accessories, and style guides.
- Implemented a dynamic JavaScript-based product catalog supporting product details, pricing, ratings, descriptions, specifications, and affiliate purchase links.
- Developed reusable **product and guide page structures** with DOM manipulation, responsive layouts, sticky navigation, backdrop-blur effects, and Google Fonts for a consistent user interface.
- Structured and deployed the website on **GitHub Pages**, integrating affiliate links, disclosure content, SEO-friendly page organization, and scalable content management through JavaScript-based data files.
- **Tech Stack:** HTML5, CSS3, JavaScript, DOM Manipulation, Git, GitHub Pages

AI Based Traffic Density Monitor | Sep 2025 - Dec 2025

- Developed an AI-based traffic monitoring prototype integrating IR sensors, automated traffic lights, and a miniature road-network model for real-time vehicle detection and traffic management.
- Implemented real-time traffic-density detection using multiple IR sensors and embedded control logic, enabling adaptive traffic-signal operation based on vehicle presence across different lanes.
- Designed an automated traffic-light control system that dynamically adjusted signal operation according to detected traffic conditions, demonstrating an intelligent approach to intersection management.
- Built and tested a functional hardware prototype combining sensor-based detection, microcontroller programming, LED signal indicators, and traffic-control logic to simulate real-world smart transportation systems.
- **Tech Stack:** Arduino, IR Sensors, Embedded C/C++, LED Traffic Signals, Traffic-Density Detection, Circuit Prototyping, Miniature Road Network.

TRAINING

Neo Colab | [Certificate](#) Jan 2026 - May 2026

C Programming Training

Programming Trainee

- Learned core C programming concepts including data types, operators, conditional statements and loops.
- Developed programs using functions, arrays, strings, pointers and structures.
- Practiced problem-solving through coding exercises and algorithmic programming challenges
- Gained hands-on experience with searching, sorting and basic data manipulation techniques.
- Strengthened logical thinking and programming skills through regular coding practice

CERTIFICATES

- Introduction to Artificial Intelligence | [Infosys Springboard](#) Mar 2026
- Basics of Python | [Infosys Springboard](#) Aug 2026
- C++ Programming | [Saylor Academy](#) Jan 2026
- Certificate of appreciation for completing C language course | [Neo Colab](#) May 2026

ACHIEVEMENTS

- Developed and deployed, a responsive fashion discovery and affiliate platform **tested with 30+ concurrent users**, with optimized frontend rendering and GitHub Pages deployment.
- Solved more than 300 programming problems on online coding platforms during regular practice and learning.
- Maintained consistent coding practice and improved logical through regular programming and problem-solving exercises.

EDUCATION

Lovely Professional University	Phagwara, Punjab
• <i>Bachelor of Technology - Computer Science and Engineering; CGPA: 8.64</i>	<i>Aug 2025- Present</i>
Narayana Junior College	Tirupati, Andhra Pradesh
• <i>Higher Secondary Education; Percentage: 95%</i>	<i>Jun 2023 - Mar 2025</i>
Gautam Talent School	Tirupati, Andhra Pradesh
• <i>Secondary Education; Percentage: 95%</i>	<i>Jun 2022 - Mar 2023</i>
